- The application and maintenance of chemicals to control dust on crushed rock surfaced roads shall be by permit only and in accordance with the following conditions.

- Dust control chemicals may be applied by an approved contractor and/or applicant. The applicant or contractor applying a dust control agent shall notify the County Engineer’s Office at (319) 267-2630, one week in advance of each application so the roadway may be properly shaped prior to application.
Recommendation is 2 applications or more and typically one application lasts 6-8 weeks.

- Applicant agrees to flag the proposed treatment area prior to application and to maintain flags throughout the season. Failure to do so may result in areas being bladed mid-season. Flags are available at the Engineer’s Office at the Courthouse in Allison.

- Applicant shall be responsible for maintaining roughness/potholes that develop. Should the County determine that blading is necessary due to weather related or unsafe road conditions; the County shall grade or blade without notice. **No refund or retreatment of surface will be made in these cases.**

- Butler County will blade through dust control areas in mid-October to prepare roads for winter, without notice to applicant.

- **All agreements are made between vendor and applicant.** Butler County assumes no responsibility for any dust control service.
