How Many Applications?		
Material Applied		
<b>Vendor Name</b>		

- The application and maintenance of chemicals to control dust on crushed rock surfaced roads shall be by permit only and in accordance with the **following conditions.**
  
- Approved materials include the following or combinations thereof: Calcium Chloride, Lignin Sulfonate, Magnesium Chloride. Other proprietary products will be considered on a case by case basis. **No motor oil is allowed.**
  
- Dust control chemicals may be applied by an approved contractor and/or applicant. The contractor and/or applicant applying a dust control agent shall notify the County Engineer’s Office at (319) 267-2630, one week in advance of each application so the roadway may be inspected to determine its condition prior to application. **Typically, dust control agents last for 6-8 weeks. For season long control, 2 or more applications are suggested.**
  
- **Applicant agrees to flag** the proposed treatment area on all sides prior to application and to maintain flags throughout the season. Applicant or Contractor **shall notify** the county once chemical is applied so that we are aware of the status of the application. Failure to flag and notify may result in areas being bladed mid-season. Flags are available at the Engineer’s Office at the Courthouse in Allison.
  
- **No refund or retreatment of surface will be made** should the County determine that blading is necessary due to weather related or unsafe road conditions in the treated area. Applicant shall be responsible for maintaining roughness/potholes that develop between applications.
  
- **Butler County will blade through dust control areas to prepare roads for winter**, typically mid-October, without notice.
  
- **All agreements are made between contractor and applicant.** Butler County assumes no responsibility for any dust control service.

I agree to the conditions set out in this permit.
